EXPERIENCE

CODEX-SOFT - Software Developer (Full-stack JavaScript)

since January 2018

I worked on 2 projects. First project was related with content. It consisted of 3 parts: admin part for collecting and preparing content for display, shop with content plugins and toolbars for sold content display. On this project I was React developer and set up CI process for parts of project. Second project is CMS for museums that helps for users to create application in few steps for display some museum content. I'm working on this project as Full-stack JavaScript developer.

EDUCATION

JAVASCRIPT DEVELOPER

The Rolling Scopes School

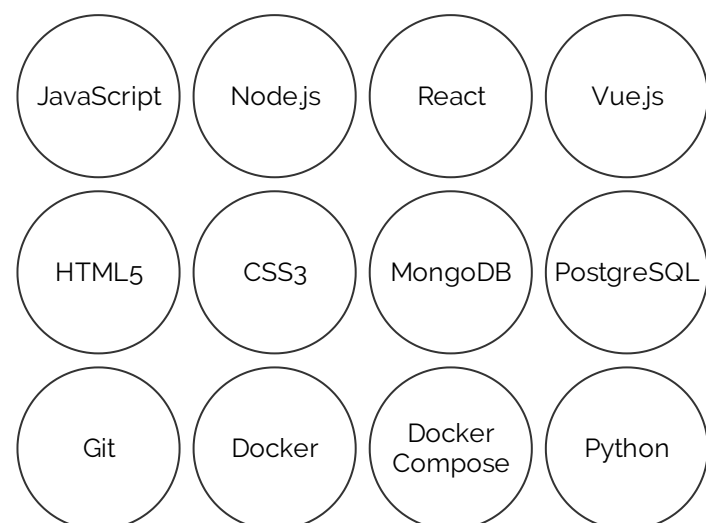

JAVASCRIPT DEVELOPER

Ittransition

MATHEMATICIAN

Belarusian State University

SKILLS

Currently I'm working with ECMAScript 6+ Edition. Working with Node.js frameworks as like Feathers, Express, Fastify. Used React with Redux, Redux-Thunk/Saga and Vue.js with Vuex. I have experience with Mongo/Postgres CLI and used ORMs Mongose (Mongo) and Sequelize (Postgres).
